

# Territorial transitions dynamics towards organic farming

Confrontation of Italian, Austrian and French  
case studies

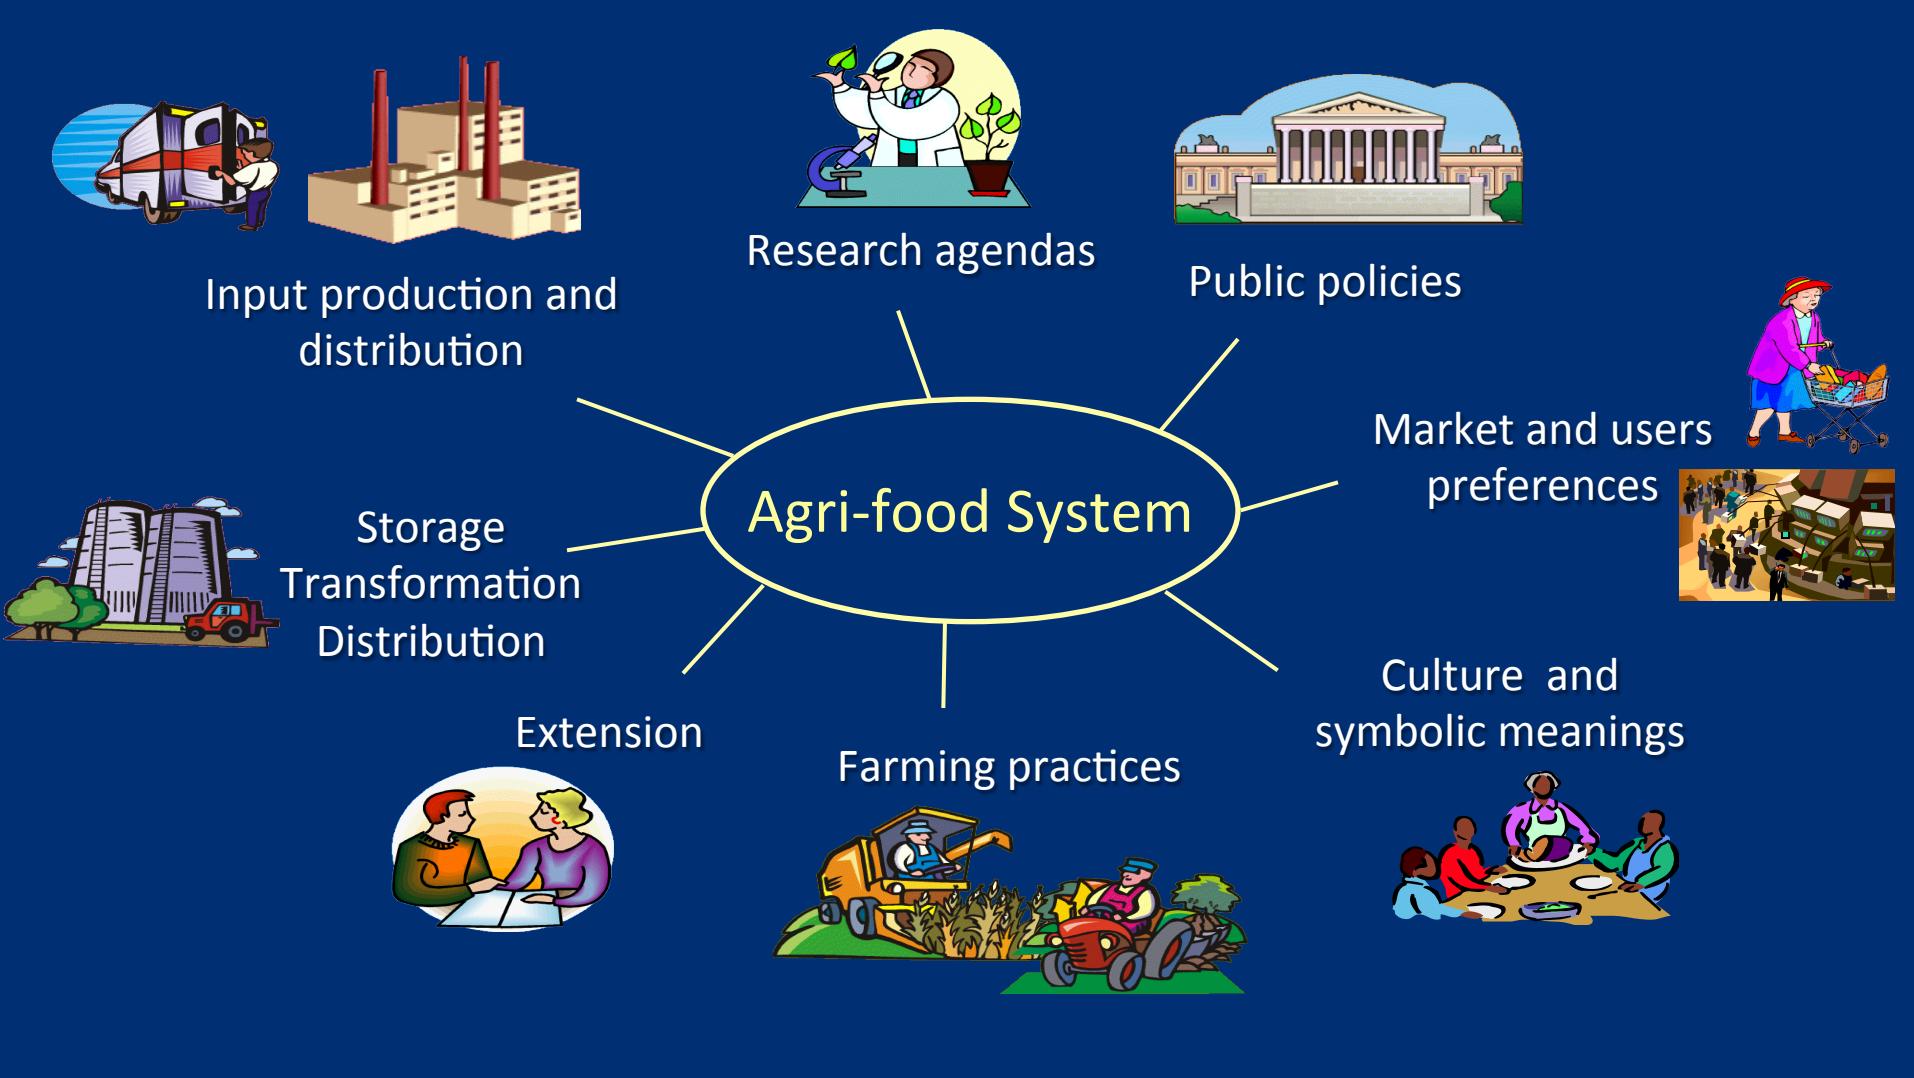

Claire Lamine et Sibylle Bui, INRA Ecodéveloppement

Increasing structuration  
of activities in local practices

# Theory of socio-technical transitions

The Multi-Level Perspective  
Geels, 2002

# Hypothesis

The territory is a governance level that may facilitate impulsing a transition process towards agroecology

# Methodology

## Ethnographic study

- Observations
- Qualitative interviews
- Archival analysis

➔ Long-term evolution of practices and social configurations

# Methodology

3 case studies

# Methodology

3 case studies:

- Public policies

➔ how local authorities progressively become a major actor of the agri-food system

# Methodology

3 case studies:

- Public policies
- Agricultural cooperative

➔ how a « traditional » farming organisation ends up playing a leading role in promoting OF as a viable model

# Methodology

3 case studies:

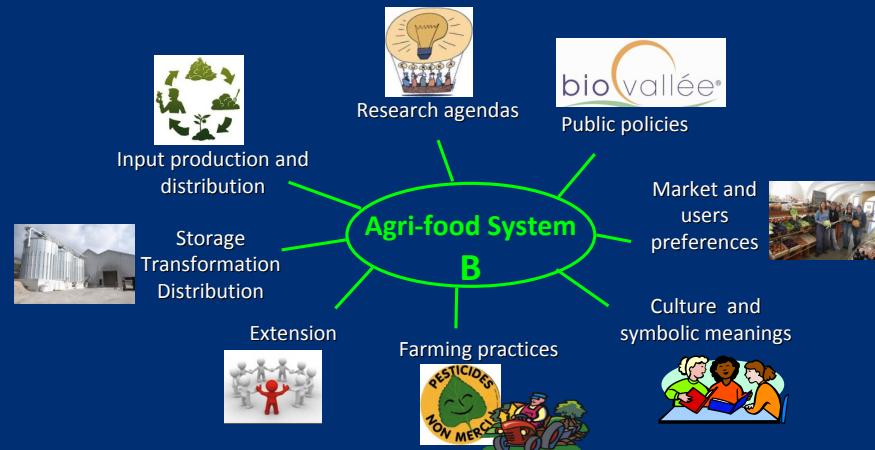

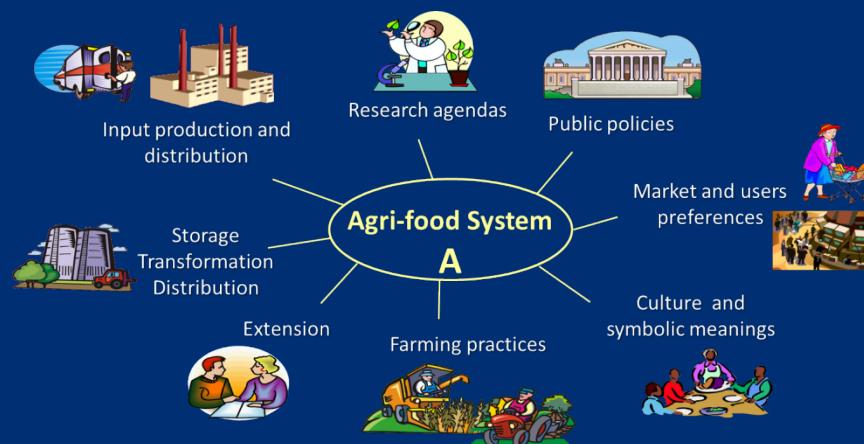

- Public policies
- Agricultural cooperative
- Consumers' initiative

➔ how civil society becomes an actor of  
the agri-food system

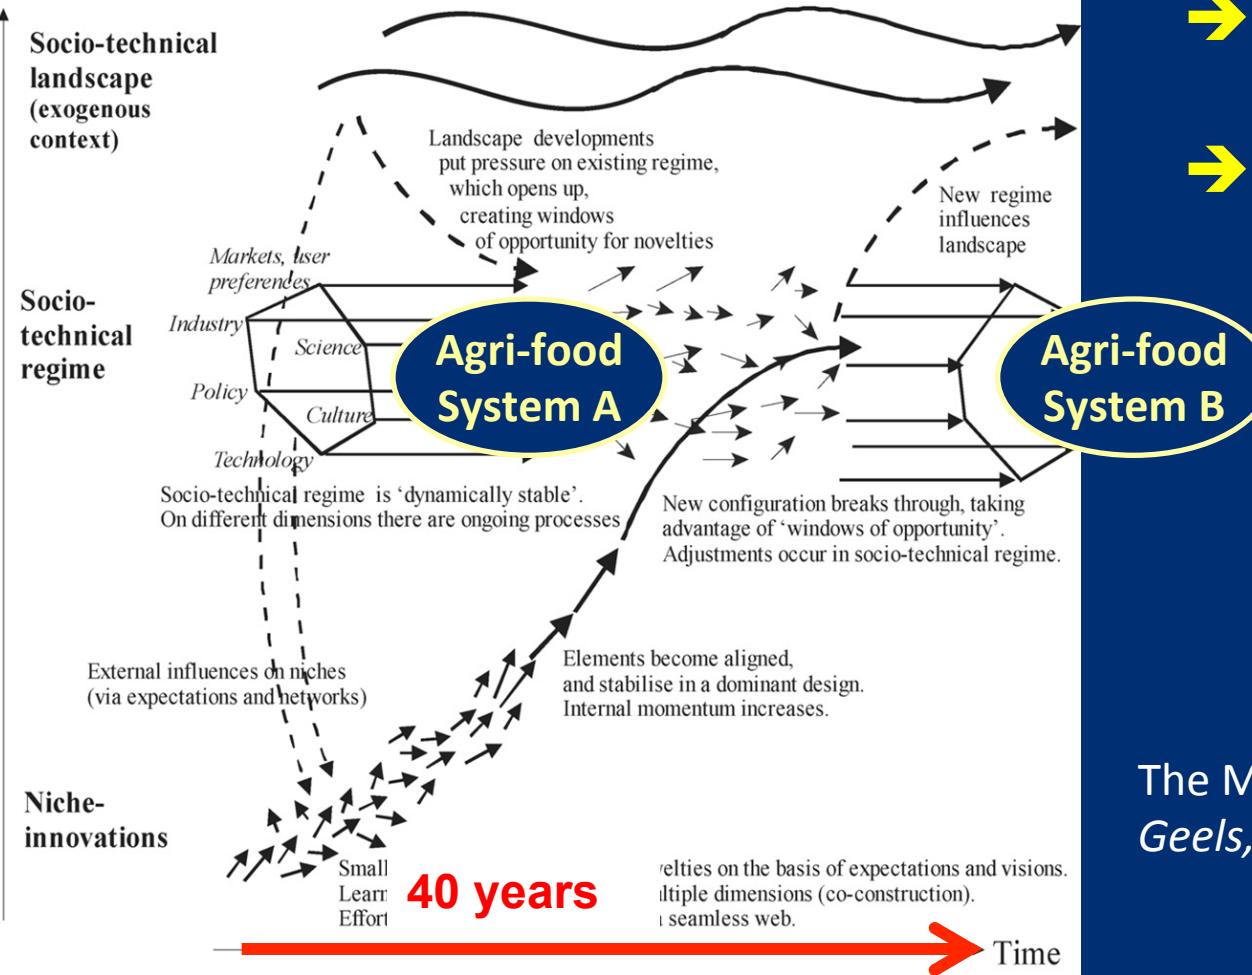

# Results

3 case studies → identification of transition processes

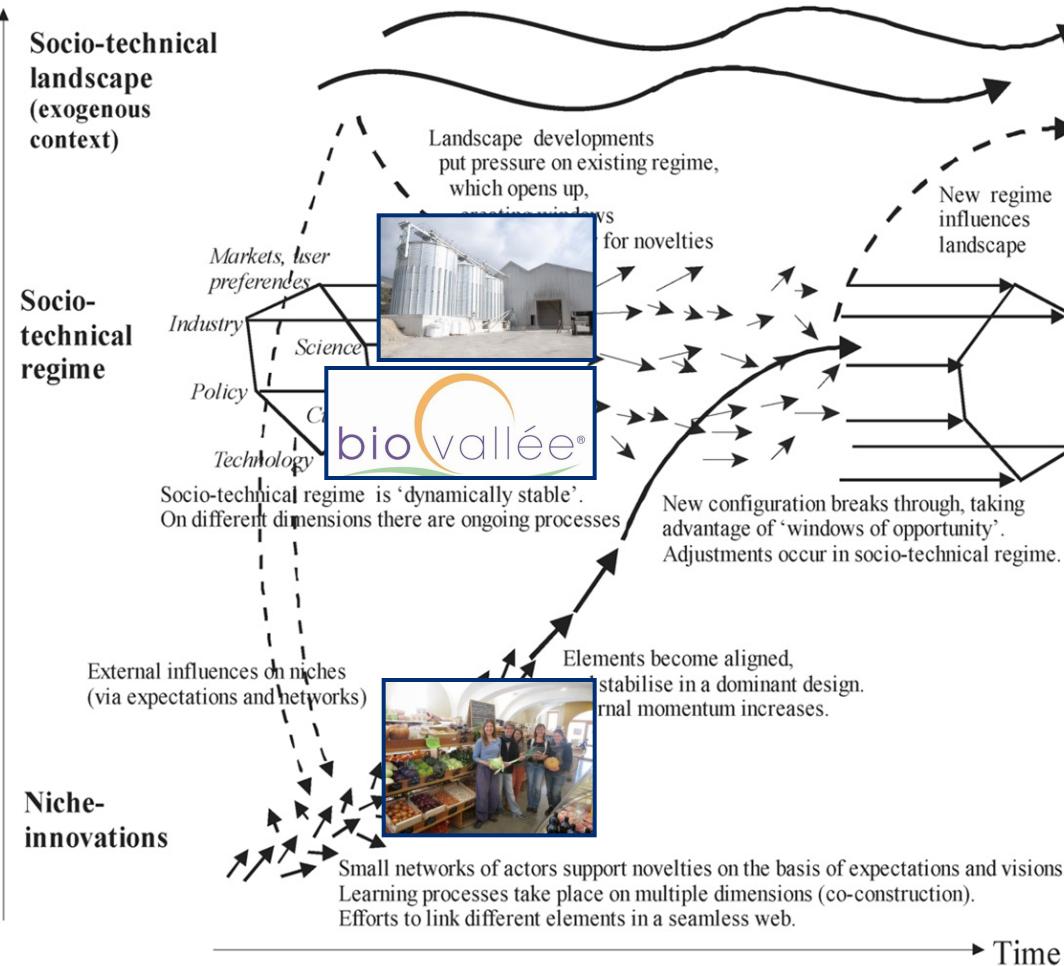

Increasing structuration  
of activities in local practices

→ Characterization of long term processes  
→ Empirical testing of the MLP at the territorial scale

The Multi-Level Perspective  
Geels, 2002

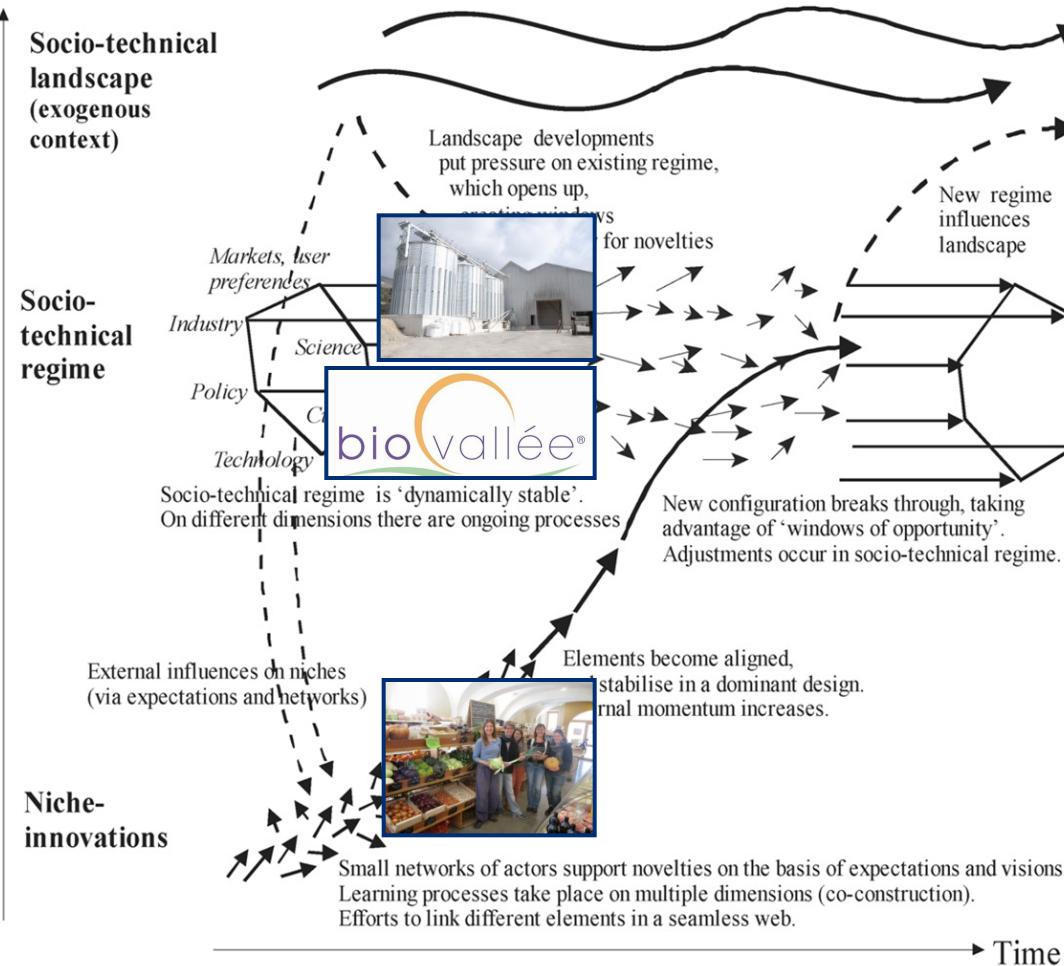

Increasing structuration  
of activities in local practices

- Characterization of long term processes
- Empirical testing of the MLP at the territorial scale
- A transition dynamic driven by both niche and regime actors

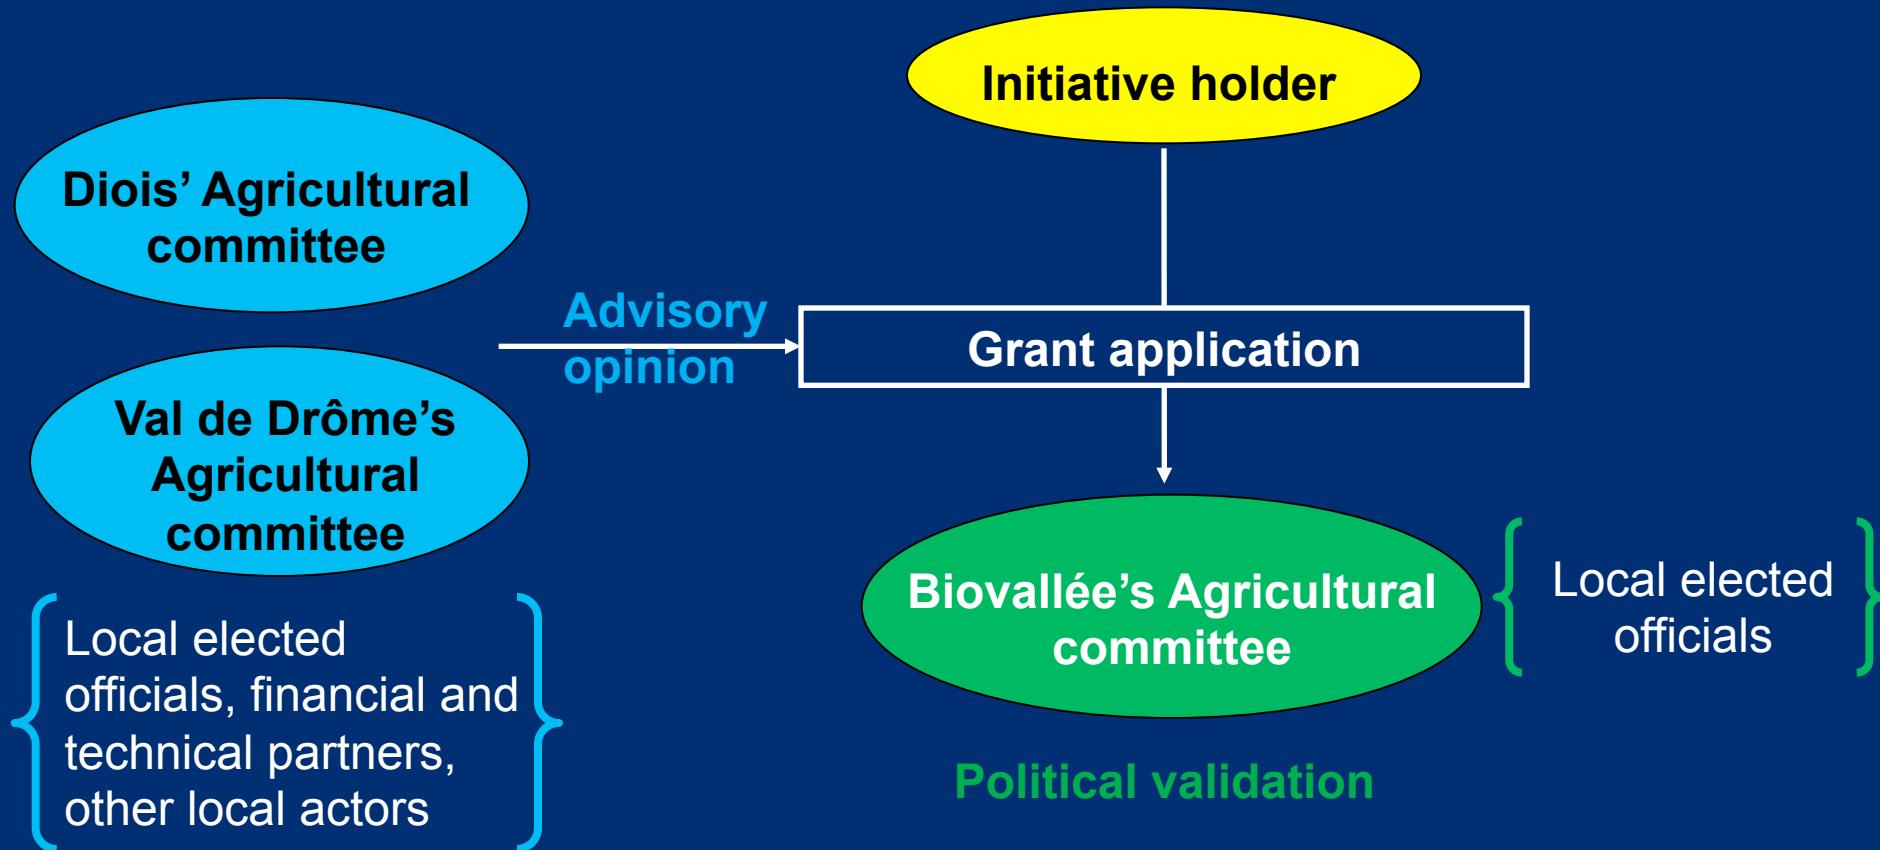

The Multi-Level Perspective  
Geels, 2002

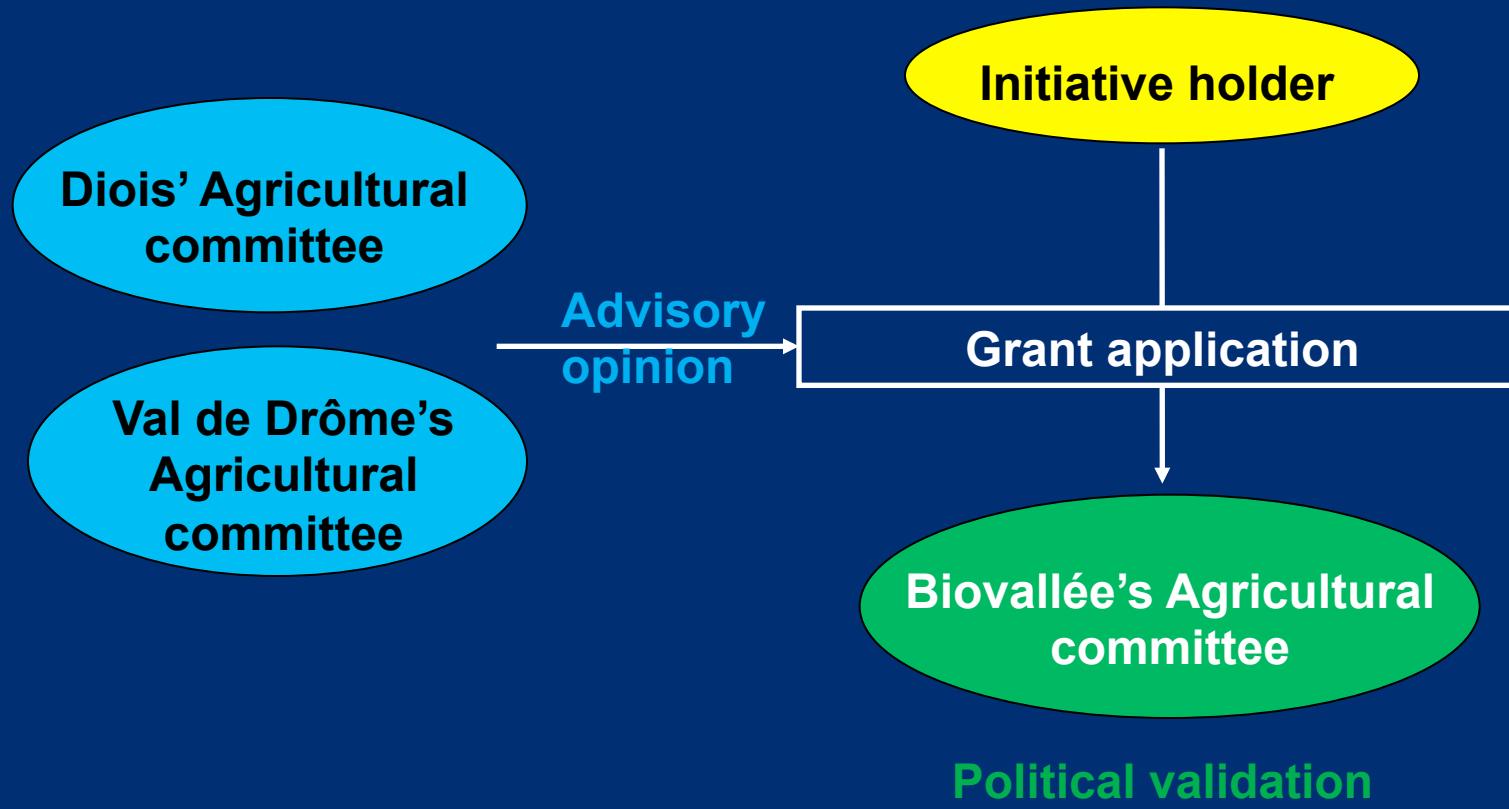

Increasing structuration  
of activities in local practices

- Characterization of long term processes
- Empirical testing of the MLP at the territorial scale
- A transition dynamic driven by both niche and regime actors
- How do actors gain a grip on the agri-food system?

The Multi-Level Perspective  
Geels, 2002

➔ **A concerted management but not a shared governance**

- Analysis of the governance system
  - Analysis of controversies
- ➔ Biovallée's agricultural program crystallized oppositions between proponents of conventional ag. and proponents of alternative agri-food models

Brand Biovallée®

-> association Biovallée ®

- Objective:  
« To get local actors who embrace the values of Biovallée to join in and to know each other »

# Association Biovallée®

- Objective:  
« To get local actors who embrace the values of Biovallée to join in and to know each other »
- 3 colleges : local authorities, private companies, associations → a genuine shared governance

# Association Biovallée®

- A rallying structure

# Association Biovallée®

- A rallying structure  
-> somewhere to exploit synergies and complementarities and to override controversies?

# Association Biovallée®

- A rallying structure
  - > a space to exploit synergies and complementarities and to override controversies?
  - > a space where emerge a new actors' network and new problem definitions

# Comparing 3 « bioregions » FR/AU/IT

- Biovallée, Bioregion Mühlviertel (AU), Biocilento (IT)
- Within the European project « Healthygrowth » (Core Organic)
- Ongoing work
- First insights based on several internal meetings and cross-readings
- An open seminar here in Biovallée on the 10th of June

# 4<sup>e</sup> séminaire Dynamiques territoriales de transition vers l'AB : LES BIOREGIONS - 10 juin 2014

9h45 Accueil par Philippe Méjean, chef de projet Biovallée, et Claire Lamine

10h15 Patrizia Pugliese et Annarita Antonelli (CIHEAM-IAMB Bari, Italie) : le cas du Bio-Distretto Cilento

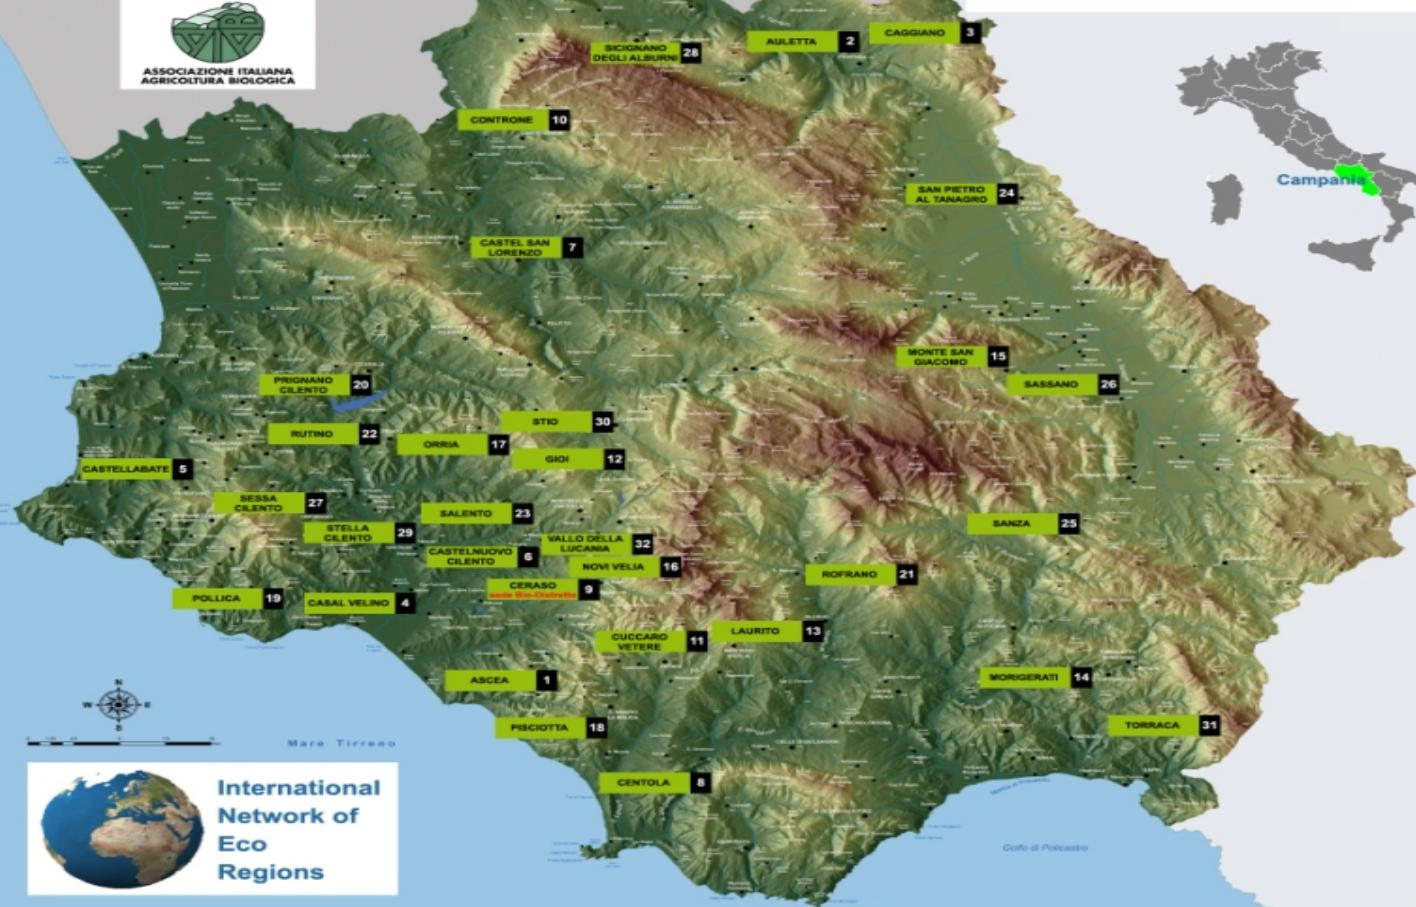

11h15 Sibylle Bui (Inra-Ecodéveloppement, France) : Le projet de Biovallée® : des filières solides mais une dynamique encore en construction

12h15 Présentation par Philippe Méjean et Salvatore Basile du partenariat entre Biovallée et le Bio-Distretto Cilento

14h Marie-Laure Prévost (UMR Innovation-Cermosem, France) : Une rencontre filière-(éco)territoire : le cas des entreprises des plantes à parfum, aromatiques et médicinales dans la Biovallée

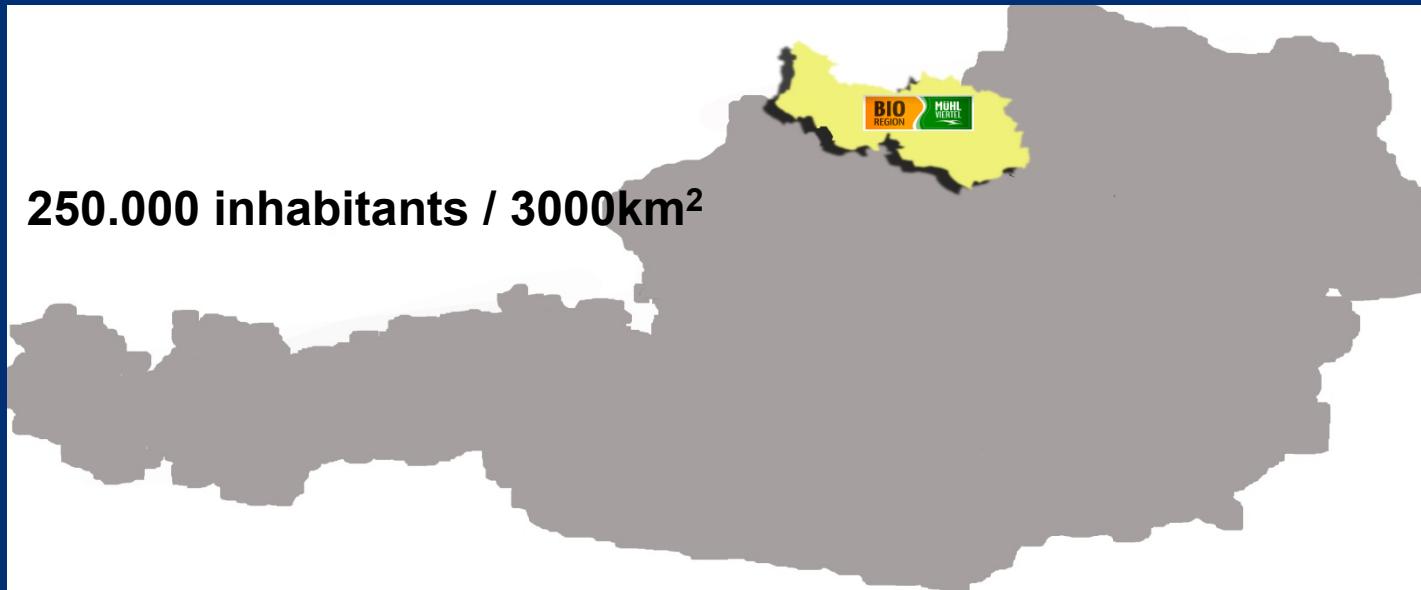

15h Markus Schermer et Christoph Furtschegger (Innsbruck Uni, Autriche) : The ‘Bioregion Mühlviertel’: Strength and weaknesses of territorial integration

16h Discussion générale

**250.000 inhabitants / 3000km<sup>2</sup>**

# Comparing 3 « bioregions » FR/AU/IT

	Biovallee	Bioregion Mühlviertel	Biocilento
Area	2200 km <sup>2</sup>	3090 km <sup>2</sup>	3200 km <sup>2</sup>
Population	54.000	270.000	
Population density	ca. 25/km <sup>2</sup>	ca. 90/km <sup>2</sup>	
Average farm size	58 ha (but large differences)	20-30 ha	
Municipalities	102	122	32 (out of 95)
Districts	2	4	
Percentage of Organic (farms)	30% (vs 20% in 2008/09)	27% (national average 18,5%)	15% (450 farms)
Main product types	Arable crops Extensive livestock (mountains) Wine Poultry/eggs, Fruits, Seeds Medicinal and herbal plants	Milk & Dairy production Beef & Pork Arable crops, potatoes Some herbs and hops	

# Comparing 3 « bioregions » FR/AU/IT

	<b>Biovallee</b>	<b>Bioregion Mühlviertel</b>	<b>Biocilento</b>
Foundation	2005	2002 (first idea) – 2010 (project)	2004
Institutional form	Public project + a Biovallee brand association		Association , + national biodistretti network
Leaders/ members	Districts	Leader regions, OF org., enterprises	Region, province, national parc, municipalities, AIAB
Budget	10M€ for 2009-2014		No regular funding
Use of the « brand »	Based on a charter, run by an independent association , and not for products	yes, based on criteria (agriculture + tourism)	yes, based on criteria

# Common features and differences

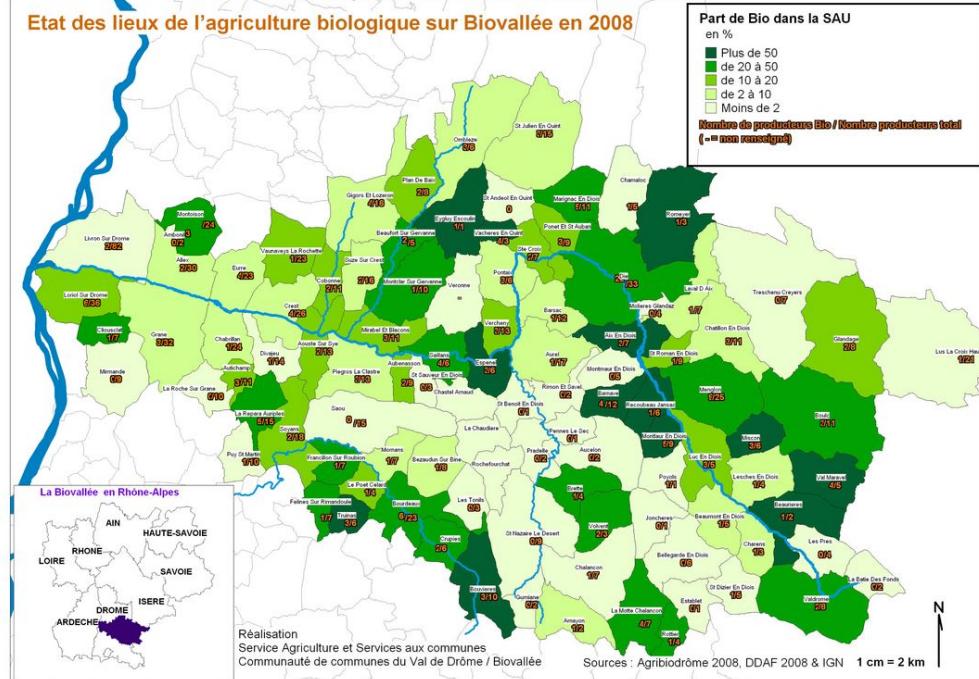

- 3 regions with a historical presence of organic farming (pioneers)
- A diversified agriculture (less in AU) and therefore a cross-products/industries ambition and action
- Projects that are more focused on agriculture and tourism (AU/IT) or that aim a more encompassing ecologisation strategy
- A shared capacity to mobilize public funds but instability
- Different leaders/initiators (local authorities in FR, organic org. In IT)
- Some dependency towards key persons (IT, less in FR/AU)
- Difficulties in gaining in legitimacy towards farmers and/or institutions and/or general public
- Biovallee's social innovations are inspiring to others: *test area, observatory, public food procurement*

# Some research questions raised by this first comparison

- Different sociologies of farmers and populations (ex. neorurals in France) -> does it lead to different conceptions of what a bioregion can be?
- The respective weight of local authorities, agricultural stakeholders (organic/others), civil society, and their inclusion in the governance
- The different conceptions of participation, the way controversies are handled, and the link to the projects' perception and legitimacy
- Boundary issues over what is (part of) the bioregion or not (more than organic, less than, different)
- Networks effects, at the national scale (case of IT with 2 competing networks), and at the European one

**Etat des lieux de l'agriculture biologique sur Biovallée en 2008**

« hier et demain », 3-5 décembre 2014, Biovallée – Le Campus, Eurre
